NEW QUESTION: 1

Your company has an Active Directory domain.

You are planning the deployment of Windows 7 to client computers that are located in a main office and in satellite offices. All client computers use the same hardware. Your company's security policy has the following requirements:

All client computers in the main office must run Windows 7 Enterprise.

All client computers in the satellite offices must use BitLocker.

All client computers in the main office must apply a custom security template.

The template must not apply to client computers in the satellite offices.

You need to recommend an image-creation strategy that meets the requirements of the security policy. The solution must minimize administrative effort. What should you include in your recommendations?

- A. One image for the main office computers and one image for the satellite office computers. A Group Policy object
- B. One image for all client computers and a Data Recovery Agent. A Security database (secedit.sdb).
- C. One image for all client computers and a Group Policy object.
- D. One image for the main office computers and one image for the satellite office computers. A Data Recovery Agent and a Security database (secedit.sdb)
