Of course, the premise is that you have already downloaded the APP version of our 4A0-250 study materials, If you have exam anxiety and fail many times with bad mark we also will be your best choice.

NEW QUESTION: 1

The system administrator of Cosmic Solutions recently created a custom profile for sales users that allows them to view and edit the records of a custom object called 'Shipment'. There are more than 100 sales users in the company. The Sales Director has now informed the administrator that five of those users should not be able to edit any Shipment records. What should a Solution Architect recommend for the requirement? Choose 1 answer.

- A.** Create a new profile without 'Edit' access to the 'Shipment' object and assign it to the five users.
- B.** Create a sharing rule that grants only 'Read' access to the records of the 'Shipment' object.
- C.** Edit the existing custom profile assigned to the sales users and remove 'Edit' access to the 'Shipment' object.
- D.** Create a permission set without 'Edit' access to the 'Shipment' object and assign it to the five

Answer: A

NEW QUESTION: 2

Which of the following protocols multicasts messages and information among all member devices in an IP multicast group?

- A.** ARP
- B.** TCP
- C.** ICMP
- D.** IGMP

Answer: D

NEW QUESTION: 3

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2.

You create a new inbound rule by using Windows Firewall with Advanced Security.

You need to configure the rule to allow Server1 to accept unsolicited inbound packets that are received through a network address translation (NAT) device on the network.

Which setting in the rule should you configure?

- A. Edge traversal
- B. Remote IP address
- C. Interface types
- D. Authorized computers

Answer: A

Explanation:

Edge traversal - This indicates whether edge traversal is enabled (Yes) or disabled (No). When edge traversal is enabled, the application, service, or port to which the rule applies is globally addressable and accessible from outside a network address translation (NAT) or edge device. Select one of the following options from the list: Block edge traversal (default) - Prevent applications from receiving unsolicited traffic from the Internet through a NAT edge device. Allow edge traversal - Allow applications to receive unsolicited traffic directly from the Internet through a NAT edge device. Defer to user - Let the user decide whether to allow unsolicited traffic from the Internet through a NAT edge device when an application requests it. Defer to application - Let each application determine whether to allow unsolicited traffic from the Internet through a NAT edge device.
